No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1986 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 249

NUMBER 1, AUGUST 15, 1986

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Kinetic and Inhibition Studies on Reduction of Diphenyl Sulfoxide by Guinea Pig Liver Aldehyde Oxidase	<i>Shin'ichi Yoshihara and Kiyoshi Tatsumi</i>	8
Dynamic Reactivities of Dextranucrase	<i>Susan L. Ditson, Stella M. Sung, and Robert M. Mayer</i>	53
Use of Alternate Substrates to Probe the Order of Substrate Addition to Dopamine β -Hydroxylase	<i>Paul F. Fitzpatrick, Mark R. Harpel, and Joseph J. Villafranca</i>	70
The Identification and Characterization of Two Cyclic Nucleotide Phosphodiesterases from Bovine Adrenal Medulla	<i>Janice Manzi Sabatine and Carole J. Coffee</i>	95
Formation of the <i>N</i> -Methylnicotinamide Adenine Dinucleotide Derivative of NAD in Intact Rat Pituitary Tumor GH ₃ and Human Promyelocytic Leukemia HL-60 Cells	<i>George S. Johnson and Diane L. Lucas</i>	148
Characterization of Polyisoprenyl Phosphate Phosphatase Activity in Rat Liver	<i>R. Kennedy Keller, W. Lee Adair, Jr., Nancy Cafmeyer, F. Anthony Simion, Becca Fleischer, and Sidney Fleischer</i>	207
Isolation of Multiple Forms of Indanol Dehydrogenase Associated with 17 β -Hydroxysteroid Dehydrogenase Activity from Male Rabbit Liver	<i>Akira Hara, Kinya Kariya, Mitsuhiro Nakamura, Toshihiro Nakayama, and Hideo Sawada</i>	225

GLYCOPROTEINS AND GLYCOLIPIDS

Purification and Characterization of a Steroid-Binding Sialoglycoprotein from Rat Ventral Prostate	<i>Tipaporn Limpaseni and Montri Chulavatnatol</i>	154
Carbohydrate Binding Properties of the Stinging Nettle (<i>Urtica dioica</i>) Rhizome Lectin	<i>Naoto Shibuya, Irwin J. Goldstein, Jules A. Shafer, Willey J. Peumans, and Willem F. Broekaert</i>	215
A New Ganglioside in Human Meconium Detected with Antiserum against Human Milk Sialyltetrasaccharide a	<i>Pedro A. Prieto and David F. Smith</i>	243

HORMONE STRUCTURE AND FUNCTION

Specific Binding of 24R,25-Dihydroxyvitamin D ₃ to Chick Intestinal Mucosa: 24R,25-Dihydroxyvitamin D ₃ Is an Allosteric Effector of 1,25-Dihydroxyvitamin D ₃ Binding	<i>François Wilhelm, F. Patrick Ross, and Anthony W. Norman</i>	88
---	---	----

LIPIDS AND PROSTAGLANDINS

The Oxidation of Arachidonic Acid by the Cyclooxygenase Activity of Purified Prostaglandin H Synthase: Spin Trapping of a Carbon-Centered Free Radical Intermediate	<i>Jörg Schreiber, Thomas E. Eling, and Ronald P. Mason</i>	126
---	---	-----

MEMBRANES, CELL SURFACES, AND RECEPTORS

- Endogenous Phosphorylation of Proteins and Phosphatidylinositol in the Plasma Membranes of a Human Astrocytoma *Aileen F. Knowles* 76
- Regulation of Epidermal Growth Factor Receptors by Glucocorticoids during the Cell Cycle in HeLa S₃ Cells
Bradford O. Fanger, R. Alexander Currie, and John A. Cidlowski 116
- Magnesium and Manganese Ions Modulate Ca²⁺ Uptake and Its Energetic Coupling in Sarcoplasmic Reticulum *A. Gomes da Costa and Vitor M. C. Madeira* 199
- The Interaction of Tb³⁺ with the Human Platelet Surface
Joseph Loscalzo and Dimitry Rabkin 237

MOLECULAR BIOLOGY, GENE EXPRESSION, AND DEVELOPMENTAL BIOCHEMISTRY

- Modulation of Protein Biosynthesis during Early Stages of Differentiation in Retinoic Acid Treated F9 Teratocarcinoma Cells
Anne Griep, Nancy C. Kendrick, and Hector F. DeLuca 180

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

- Analysis of Chitin Structure by Nuclear Magnetic Resonance Spectroscopy and Chitinolytic Enzyme Digestion
Tamo Fukamizo, Karl J. Kramer, Delbert D. Mueller, Jacob Schaefer, Joel Garbow, and Gary S. Jacob 15
- The Role of Magnesium and Potassium Ions in the Molecular Mechanism of Ribosome Assembly: Hydrodynamic, Conformational, and Thermal Stability Studies of 16 S RNA from *Escherichia coli* Ribosomes
Susan H. Allen and Kin-Ping Wong 137

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

- Functional Linkage between Phycobilisome and Reaction Center in Two Phycobilisome Oxygen-Evolving Photosystem II Preparations Isolated from the Thermophilic Cyanobacterium *Synechococcus* sp.
Mariko Kura-Hotta, Kazuhiko Satoh, and Sakae Katoh 1
- The C-S Lyases of Higher Plants: Preparation and Properties of Homogeneous Alliin Lyase from Garlic (*Allium sativum*)
Linda P. Nock and Mendel Mazelis 27
- Regulation of NADP-Malate Dehydrogenase in C₄ Plants: Effect of Varying NADPH to NADP Ratios and Thioredoxin Redox State on Enzyme Activity in Reconstituted Systems *F. Rebeille and M. D. Hatch* 164
- Regulation of NADP-Malate Dehydrogenase in C₄ Plants: Relationship among Enzyme Activity, NADPH to NADP Ratios, and Thioredoxin Redox States in Intact Maize Mesophyll Chloroplasts *F. Rebeille and M. D. Hatch* 171

PROTEIN STRUCTURE AND FUNCTION

- Myoglobin Interspecies Structural Differences: Effects on Autoxidation and Oxygenation *David J. Livingston, Daniel A. Watts, and W. Duane Brown* 106

PROTEIN TURNOVER, PROTEOLYSIS, AND POST-TRANSLATIONAL PROCESSING

- Effect of Streptozotocin-Induced Diabetes and Insulin Treatment on the Synthesis of Hexokinase II in the Skeletal Muscle of the Rat
Sandra K. Frank and Herbert J. Fromm 61
- Inhibition of Translation in L-Cell Lysates by Free Polyadenylic Acid: Differences in Sensitivity among Different mRNAs and Possible Involvement of an Initiation Factor
Guy Lemay and Stewart Millward 191

REGULATION OF METABOLISM AND OF ENZYME ACTION

- Regulation of Liver Glycogen Synthase Phosphatase Activity by ATP-Mg
Daniel P. Gilboe and Frank Q. Nuttall 34
- The Effect of Substrates and Competitive Inhibitors on the Phosphatase-Dependent Activation of Hepatic Hydroxymethylglutaryl CoA Reductase
Kenneth R. Feingold and Arthur H. Moser 46

NUMBER 2, SEPTEMBER 1986

COMMUNICATIONS

- The Removal of the Carboxy-Terminal Region of Tubulin Favors Its Vinblastine-Induced Aggregation into Spiral-like Structures
Luis Serrano, Javier de la Torre, Richard F. Luduena, and Jesus Avila 611
- Dual Regulation of Adenylate Cyclase and Guanylate Cyclase: α_2 -Adrenergic Signal Transduction in Adrenocortical Carcinoma Cells
Neelam Jaiswal and Rameshwar K. Sharma 616
- Amino Acid Catabolism by Perfused Rat Hindquarters: Degradation of Threonine and Isoleucine
Piotr W. D. Scislowski and E. Jack Davis 620

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

- Monoclonal Antibodies to Liver Microsomal Cytochrome P-450E of the Marine Fish *Stenotomus chrysops* (scup): Cross Reactivity with 3-Methylcholanthrene Induced Rat Cytochrome P-450
Sang S. Park, Haruko Miller, Alan V. Klotz, Pamela J. Kloepper-Sams, John J. Stegeman, and Harry V. Gelboin 339
- Stretch-Induced Myosin Light Chain Phosphorylation in Rat Uterus
Sándor Csabina, Michael Bárány, and Kate Bárány 374

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

- Cyclic AMP Activation of a Triglyceride Lipase in Broken Cell Preparations of Rat Heart
Warren K. Palmer, Roseann A. Caruso, and Lawrence B. Oscai 255
- Analysis of the Peroxidatic Mode of Action of Catalase
S. Paul Sichak and Alexander L. Dounce 286
- Comparison of the Enzymatic Behavior of High Molecular Weight and Free Lysyl-tRNA Synthetase from Rat Liver: Kinetic Analysis of Lysylation of tRNA
Samir Z. Wahab and David C. H. Yang 407
- Purification and Kinetic Characterization of a Phenol-Sulfating Form of Phenol Sulfotransferase from Human Brain
Russell M. Whittemore, L. Bruce Pearce, and Jerome A. Roth 464

GLYCOPROTEINS AND GLYCOLIPIDS

- Tracheal Carbohydrate Antigens Identified by Monoclonal Antibodies
*Carol B. Basbaum, Albert Chow, Bruce A. Macher, Walter E. Finkbeiner, D. Veissiere,
 and L. Scott Forsberg* 363
- Two Chinese Hamster Ovary Glycosylation Mutants Affected in the Conversion
 of GDP-Mannose to GDP-Fucose
James Ripka, Anthony Adamany, and Pamela Stanley 533
- Characterization of Cellular Oligosaccharides from Normal and Cystic Fibrotic
 Fibroblasts Using Sequential Endoglycosidase Digestions
Dominique Bozon, Anthony L. Tarentino, Robert B. Trimble, and Frank Maley 546

LIPIDS AND PROSTAGLANDINS

- Prostaglandin H Synthase and Hydroperoxides: Peroxidase Reaction and Inacti-
 vation Kinetics *Richard J. Kulmacz* 273
- Distribution of Lipids and Apolipoproteins in Human Plasma by Vertical Spin
 Ultracentrifugation *E. Campos and W. J. McConathy* 455

MEMBRANES, CELL SURFACES, AND RECEPTORS

- Transglutaminase Modification of Rhodopsin in Retinal Rod Outer Segment Disk
 Membranes
J. Hugh McDowell, Andrea Ubel, Randal A. Brown, and Paul A. Hargrave 506
- Gonadotropin Release and Redistribution of Calcium-Activated, Phospholipid-
 Dependent Protein Kinase in Phorbol-Stimulated Rat Pituitary Cells
Kenji Hirota, Takako Hirota, Greti Aguilera, and Kevin J. Catt 557
- Characterization and Affinity Crosslinking of Receptors for Tumor Necrosis Factor
 on Human Cells
Masafumi Tsujimoto, Rena Feinman, Masayoshi Kohase, and Jan Vilček 563
- Phosphatidylinositol-Specific Phospholipase C of Murine Lymphocytes
Yasushi Kamisaka, Satoshi Toyoshima, and Toshiaki Osawa 569

MOLECULAR BIOLOGY, GENE EXPRESSION, AND DEVELOPMENTAL BIOCHEMISTRY

- Murine Glucocorticoid Receptors: New Evidence for a Discrete Receptor Influenced
 by *H-2* *Allen S. Goldman and Masuyuki Katsumata* 316

OXYGENASES, MICROSOMES, AND P-450 REACTIONS

- Cytochrome *P-450* Isozymes from the Marine Teleost *Stenotomus chrysops*: Their
 Roles in Steroid Hydroxylation and the Influence of Cytochrome *b₅*
*Alan V. Klotz, John J. Stegeman, Bruce R. Woodin, Elisabeth A. Snowberger,
 Paul E. Thomas, and Christopher Walsh* 326
- Increased Rat Testicular Heme Oxygenase Activity Associated with Depressed
 Microsomal Heme and Cytochrome *P-450* Levels after Repeated Administra-
 tion of Human Chorionic Gonadotropin
Emily M. Sadler, Vijayapal R. Reddy, and Walter N. Piper 382
- Single Turnover Studies with Oxy-cytochrome *P-450_{cam}*
Colleen B. Brewer and Julian A. Peterson 515
- Conformational Properties of Membrane-Bound Fumarate Reductase of *Esche-
 richia coli*
Clara Fronticelli, Enrico Bucci, Arthur Zachary, and Barry P. Rosen 579

- Interferon: A Mediator of Indoleamine 2,3-Dioxygenase Induction by Lipopolysaccharide, Poly(I)·Poly(C), and Pokeweed Mitogen in Mouse Lung
Ryotaro Yoshida, Tohru Oku, Jiro Imanishi, Tsunataro Kishida, and Osamu Hayaishi 596

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

- Effects of Lysophosphatidylcholine Micelle and Phosphatidylcholine Liposome on Photoreduction of Methylviologen
Masayuki Nakagaki, Hiroaki Komatsu, and Tetsuro Handa 388
- Determination of the Concentration of Protein by Dry Weight—A Comparison with Spectrophotometric Methods
Yasuhiko Nozaki 437

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

- Metabolism of Monoterpenes: Demonstration that (+)-*cis*-Isopulegone, Not Piperitenone, Is the Key Intermediate in the Conversion of (–)-Isopiperitenone to (+)-Pulegone in Peppermint (*Mentha piperita*)
Rodney Croteau and K. V. Venkatachalam 306
- Secretion of a Lipolytic Protein Aggregate by Barley Aleurone and Its Dissociation by Starchy Endosperm
Robert Lundgard and Derek Baisted 447
- Elicitor Stimulation of the Defense Response in Cultured Plant Cells Monitored by Fluorescent Dyes
Philip S. Low and Peter F. Heinstein 472

PROTEIN STRUCTURE AND FUNCTION

- A Complete Amino Acid Sequence for the Basic Subunit of Crotoxin
Steven D. Aird, Ivan I. Kaiser, Randolph V. Lewis, and William G. Kruggel 296
- The Effect of 2,3-Diphosphoglycerate on the Solubility of Deoxyhemoglobin S
William N. Poillon, Bak C. Kim, Emily V. Welty, and Joseph A. Walder 301
- Amino Acid Sequence of a Unique Neuronal Protein: Rat Olfactory Marker Protein
W. Sydor, Z. Teitelbaum, R. Blacher, S. Sun, W. Benz, and F. L. Margolis 351
- The Effects of Elevated pH and High Salt Concentrations on Tubulin
Henrietta Brown Croom, John J. Correia, and Robley C. Williams, Jr. 397
- The Incorporation of a Fluorescent Probe into the Active Sites of One- and Two-Chain Tissue-Type Plasminogen Activator
Deborah L. Higgins and M. Christine Lamb 418
- Physical and Immunological Analysis of the Two Domains Isolated from a Variant Surface Glycoprotein of *Trypanosoma brucei*
V. Gomes, G. Huet-Duvillier, J. P. Aubert, I. Dirat, D. Tetaert, M. L. J. Moncany, C. Richet, T. Vervoort, E. Pays, and P. Degand 427
- Molecular Basis of the Isozymes of Bovine Glucose-6-phosphate Isomerase
John K. Cini and R. W. Gracy 500

PROTEIN TURNOVER, PROTEOLYSIS, AND POST-TRANSLATIONAL PROCESSING

- Human Factor XIa Cleaves Fibrinogen: Effects on Structure and Function
Cheryl F. Scott, Richard L. Mentzer, Andrei Z. Budzynski, and Robert W. Colman 480
- Preferential Action of Rat Brain Cathepsin B as a Peptidyl Dipeptidase Converting Pro-Opioid Oligopeptides
N. Marks, M. J. Berg, and M. Benuck 489
- A Kinetic Analysis of Biosynthesis and Localization of a Lysosome-Associated Membrane Glycoprotein
M. Patricia D'Souza and J. Thomas August 522

REGULATION OF METABOLISM AND OF ENZYME ACTION

Inhibition of Glycine Oxidation by Pyruvate, α -Ketoglutarate, and Branched-Chain α -Keto Acids in Rat Liver Mitochondria: Presence of Interaction between the Glycine Cleavage System and α -Keto Acid Dehydrogenase Complexes	263
<i>Hideo Kochi, Hiroshi Seino, and Kazuo Ono</i>	
Effects of Metal Ions on Sphingomyelinase Activity of <i>Bacillus cereus</i>	588
<i>Hiroh Ikezawa, Motoaki Matsushita, Masahiro Tomita, and Ryo Taguchi</i>	
Glycogen Metabolism in Neonatal Liver of the Rat	605
<i>Ronald N. Margolis and Keith Tanner</i>	
AUTHOR INDEX FOR VOLUME 249	625

The Subject Index for Volume 249 will appear in the December 1986 issue as part of a cumulative index for the year 1986.

Instructions to Authors¹

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Short Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Short Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors may send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Manuscripts should be written in clear, concise and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of figures, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in

¹ An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUB rules and recommendations, and accepted abbreviations.

the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet; footnotes to tables should be identified by superscript lowercase italic letters (^a, ^b, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $\frac{3}{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1985. Please note the following examples.

1. JONES, J. B., DILWORTH, G. L., AND STADTMAN, T. C. (1979) *Arch. Biochem. Biophys.* **195**, 255–260.
2. METZLER, D. E. (1977) *Biochemistry: The Chemical Reaction of Living Cells*, p. 298, Academic Press, New York.
3. HARRINGTON, W. F. (1979) in *The Proteins* (Neurath, H., and Hill, R. L., eds.), Vol. 4, pp. 246–409, Academic Press, New York.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
